

Navina M

Risk & Fraud Analytics | AML/KYC | Risk Management | CAML Certified | SQL, Power BI, Excel
Salem, Tamil Nadu | +91 9092278124 | navina.mk7@gmail.com | [Portfolio](#) | [LinkedIn](#) | [SQL Portfolio](#) | [GitHub](#)

Risk & Fraud Analytics professional with **2 years of experience at Amazon** specializing in **Trust & Safety investigations, buyer and seller fraud detection**, and compliance risk analysis. Reviewed **150,000+ high-risk cases** across claims, brand protection, and IP compliance while maintaining **99%+ decision accuracy**. Skilled in SQL, Power BI, and root cause analysis to identify fraud patterns, generate risk insights, and support data-driven decision making and policy enforcement.

SKILLS

Data Analytics: SQL, Python (Pandas, NumPy), Power BI (DAX, Power Query), Excel (Advanced)
Analytics & Reporting: Data Visualization, Dashboard Development, KPI Reporting, Risk Insights
Risk & Fraud Analytics: Fraud Detection, Anomaly Detection, AML & KYC, Root Cause Analysis (RCA), Risk Management, Trust & Safety Investigations, OSINT, Case Documentation & Reporting

WORK EXPERIENCE

Amazon Development Centre India Pvt. Ltd. | Investigation Associate Mar 2024 – Mar 2026

- Resolved **43,800+ risk-flagged claims** with **99.6% accuracy**, handling buyer and seller fraud, chargebacks, retrocharges, disputes, and appeals while ensuring SLA adherence and compliance with **AML & KYC controls**.
- Analyzed buyer and seller behaviors using pattern recognition and **anomaly detection** to identify emerging **fraud trends** and improve investigative decision-making.
- Delivered **audit-ready risk documentation** supporting **compliance reviews** and regulatory requirements.
- Reviewed and adjudicated **110,000+** product abuse, brand protection, content integrity, and IP compliance cases, identifying abuse patterns and policy violations while **exceeding productivity targets by 152.5%**.
- Executed policy-driven, evidence-based adjudication using **OSINT**, risk indicators, and standardized investigation frameworks (SOPs), maintaining **99.9%+ decision quality (DQ)** across high-volume investigations.
- Conducted **SQL & Excel-based data analysis** and **root cause analysis (RCA)** to generate risk insights for fraud detection and escalate systemic abuse cross-functionally.
- Awarded **Super Star Trainee** for investigative accuracy, quality benchmarks, and performance excellence.

PROJECTS

Fraud Risk Triage & Analytics System | Transaction Monitoring (SQL, Python, [Power BI](#), Generative AI) | [GitHub](#)

- Built an end-to-end fraud analytics pipeline analyzing **800K financial transactions** to detect **velocity-based fraud** using rule-based detection logic, high-risk payment behaviors, and **suspicious cross-border activity**.
- Developed **risk scoring models** and **Power BI dashboards** to prioritize high-risk transactions, visualize fraud patterns, and generate AI-driven fraud insights using the Gemini API, **reducing false positives**.

Yelp Business Reviews Analytics | End-to-End Data Analytics (Python, S3, Snowflake, SQL, [Power BI](#)) | [GitHub](#)

- Processed **6.9M+ records** and built a **Snowflake star-schema** model to enable scalable trend and sentiment analysis.
- Developed DAX-driven **Power BI dashboards** with **SQL validation** to surface category performance insights.

INTERNSHIP EXPERIENCES

Data Science & Data Analyst Intern | SQL, Python, Power BI, Machine Learning Oct 2023 – Mar 2024

- Built a **SQL-based fraud & AML monitoring system** to detect **suspicious transaction patterns** (velocity, high-value, failures), generate **risk signals**, and prioritize high-risk users for investigation.
